

**Technical Advisory Group
Position Paper**

Subject: Mitigation Process

Participant: _____

Issue: To evaluate the current mitigation process and discuss possible changes to streamline the program while keeping the integrity of wetlands protection.

- List and provide examples of other mitigation processes used by Federal, State or other local agencies that could serve as a model.
- What are the positive aspects of the current Mitigation Process?
- What are the negative aspects of the current Mitigation Process?
 - How could these negative attributes be addressed?
- How could the current mitigation process be improved?
 - Quality Control
 - Automatic denials for incomplete submittal?
 1. Application checklist?
 - Inconsistency between engineering plans and consultant plans
 - Mitigation Committee meeting process?
- Should there be a new application?
 - Provide suggested language
- What would be the Basis of Review for a mitigation project from start to finish?
 - Provide suggested language.
- What are the positive and negative attributes of “Enhanced Mitigation”?
- Should the quality of a wetland be justification to impact it?
